PROFESSIONAL SUMMARY

Junior Full Stack Developer specialized in the Java (Spring Boot) and Angular ecosystems. Known for proficiency in Git, agile methodologies, and leveraging Artificial Intelligence to optimize software delivery. Highly organized and proactive, having successfully balanced technical studies with 6 years of customer service experience as a waiter.

EXPERIENCE

Full Stack Developer (Internship) April 2025 – May 2026, Seville, Spain

Ayesa

- Developed and maintained the frontend of internal enterprise web applications using Angular.
- Collaborated on backend business logic with Spring Boot and optimized queries across relational databases (MySQL and PostgreSQL), directly handling tables with over 100,000 records.
- Maintained disciplined source code version control and collaborative branching workflows using Git repositories.
- Delivered technical support, production troubleshooting, and end-to-end feature validation.

PROJECTS

UrbiConnect

IES Cantillana · github.com/sergioam26/UrbiConnect · September 2025 – May 2026

- First prize winner of the "Municipal Incidents App" competition (Cantillana Town Hall). Cross-platform project designed and built 100% autonomously.
- AI-Assisted Development: Accelerated the development cycle to under 8 months through advanced prompt engineering in Flutter and Dart.
- Cloud Integration & QA: Implemented Firebase and the Google Maps API (reports submitted in <2 min), with performance and load testing documented in Markdown.

EDUCATION

Master's Degree in Professional Training in Artificial Intelligence & Big Data

IES Camas - Antonio Brisquet · Camas, Seville, Spain · 2026 – Present

Higher Vocational Diploma (HND / VET) – Multiplatform Applications Development (DAM)

IES Cantillana · Cantillana, Seville, Spain · 2026

High School Diploma in Science (Bachillerato)

IES Ilipa Magna · Alcalá del Río, Seville, Spain · 2020

CERTIFICATIONS

+20 Technical Certifications on OpenWebinars

OpenWebinars · 2026

- Specialization in Java, Spring Boot, professional GitFlow, REST APIs with Dart, Flutter, and agile methodologies.

SKILLS

Backend: Java, Spring Boot.

Frontend: Angular, HTML5, CSS3, JavaScript.

Databases: MySQL, PostgreSQL, Firebase (Firestore, Storage, Auth).

Version Control & Workflow: Git, GitFlow, GitHub, Markdown.

Lifecycle & Tools: Apache Maven, Javadoc.

AI-Assisted Engineering: Advanced prompt engineering for code generation and validation, fundamentals of Dart/Flutter.

Languages: Spanish (Native), English (B2 – Cambridge Certified).
