PROFESSIONAL SUMMARY

Junior Full Stack Developer specializing in Java (Spring Boot) and Angular. Strong proficiency in Git and agile methodologies, with experience leveraging Artificial Intelligence to streamline software delivery. Highly organized and proactive, with 6 years of customer service experience as a waiter alongside my technical studies.

EXPERIENCE

Full Stack Developer (Internship)

April 2025 – February 2026, Seville, Spain

Ayesa

- Developed and maintained the frontend of internal enterprise web applications using Angular.
- Collaborated on backend business logic using Spring Boot and optimized relational database queries (MySQL and PostgreSQL), working directly with tables containing over 100,000 records.
- Managed source control and collaborative branching workflows using Git.
- Delivered technical support, production troubleshooting, and end-to-end feature validation.

PROJECTS

UrbiConnect

IES Cantillana • github.com/sergioam26/UrbiConnect • September 2025 – May 2026

- **First Prize Winner: "Municipal Incidents App" Competition** (Cantillana Town Hall). Cross-platform project independently designed and developed from scratch.
- **AI-Assisted Development:** Reduced the project development time to under 8 months through advanced AI-assisted development and prompt engineering with Flutter and Dart.
- **Cloud Integration & QA:** Implemented Firebase and the Google Maps API, with report submission completed in under 2 minutes, while performing documented performance and stress testing in Markdown.

EDUCATION

Higher Vocational Diploma – Multiplatform Application Development (DAM)

IES Cantillana • Cantillana, Seville, Spain • 2026 • GPA: 8/10

High School Diploma in Science (Bachillerato)

IES Ilipa Magna • Alcalá del Río, Seville, Spain • 2020 • GPA: 9/10

CERTIFICATIONS

+20 Technical Certifications on OpenWebinars

OpenWebinars • 2026

- Training in Java, Spring Boot, Professional GitFlow, REST APIs with Dart, Flutter, and Agile Methodologies.

Artificial Intelligence: Foundations to Agents

BIG School • 2026

SKILLS

Backend: Java, Spring Boot.

Frontend: Angular, HTML5, CSS3, JavaScript.

Databases: MySQL, PostgreSQL, Firebase (Firestore, Storage, Auth).

Version Control: Git, GitFlow, GitHub, Markdown.

Lifecycle & Tools: Apache Maven, Javadoc.

AI-Assisted Engineering: Advanced prompt engineering for code generation and validation; fundamentals of Dart and Flutter.

Languages: Spanish (Native), English (B2 – Cambridge Certified).
